Real-time tracking of my research portfolio progress

portfolio complete 24 days ago

Completed Production AI Portfolio

Finalized 10-project enterprise-grade AI portfolio featuring RAG systems, LangGraph agents, LLMOps pipelines, and production infrastructure. 304 Python files with 32 test files.

#llm #rag #langgraph #llmops #production

</> 85000 LOC

portfolio complete 25 days ago

Completed privacy-preserving-phishing-detection Portfolio

Finished 21-project privacy-preserving federated phishing detection portfolio. Includes production system with React dashboard and research paper.

#federated-learning #phishing-detection #privacy #differential-privacy #production

</> 50000 LOC

portfolio complete 26 days ago

Completed Federated Learning Security Portfolio

Finalized comprehensive 30-project portfolio on FL security. Features SignGuard novel defense system achieving 94.5% detection rate. 165,000+ lines of production code.

#federated-learning #security #fraud-detection #signguard #research

</> 165000 LOC

project complete 27 days ago

Completed SignGuard ECDSA Verification Module

Implemented cryptographic signature verification for federated learning model updates using ECDSA with dynamic reputation scoring.

#federated-learning #cryptography #ecdsa #security

2500 LOC 45 experiments 8h spent

Study: Byzantine-Robust Federated Learning

Deep dive into recent papers on Byzantine-resilient aggregation strategies for federated learning systems.

#federated-learning #research #byzantine-robustness

3 papers 4h spent

milestone reached 29 days ago

Three Major GitHub Portfolios Completed

Successfully completed three comprehensive portfolios: FL Security (30 projects), privacy-preserving-phishing-detection (21 projects), and Production AI (10 projects). Combined 265,000+ lines of production code.

#milestone #portfolio #achievement

61 projects

experiment run about 1 month ago

FraudwareAnalyzer: 100 Malware Samples Analyzed

Completed static analysis of 100 banking trojan samples. Extracted behavioral patterns and API call sequences.

#security #malware-analysis #static-analysis

1 experiments 6h spent 100 samples

project start about 1 month ago

Started Byzantine Robustness Research

Beginning research on Byzantine-robust aggregation strategies for federated learning, focusing on Krum, FoolsGold, and multi-layer defenses.

#byzantine-robustness #federated-learning #security

2h spent

blog post about 1 month ago

Published: Understanding Byzantine Attacks in FL

Wrote comprehensive blog post explaining different types of Byzantine attacks in federated learning and defense strategies.

#blog #federated-learning #tutorial

code commit about 1 month ago

SignGuard: Reputation System Implementation

Implemented dynamic reputation scoring system for FL clients with decay mechanism and anomaly detection.

#federated-learning #reputation-system #python

280 LOC 5h spent
